I don't think that it hurts to contact the property owners and let them know that you are trying to get this lined up for the next couple weeks. If drilling doesn't work out for some reason, it shouldn't be an issue with those owners.

We are committed to service excellence.

Subject: RE: Tomorrow's Conference Call

Just finished up the preliminary costing and waste disposal logistics. I have drillers willing to perform the work, waste disposal contractors willing to accept the liquid waste, soil cuttings are easily managed and all I really need now would be approval of the proposed work and approval from the neighboring property owners (former supper club property and motel property). Also need to have contractors call in diggers hotline. This SOW is really weather dependent and a cold day or a breakdown can really throw off the schedule. If all goes as planned it should, take the full week, but I would not be surprised if it goes into the second week. Other option would be to have the other driller (second drill crew to install the shallow water table wells) also install the mud-rotary piezometers. Should I reach out to the property owners or wait to see if this SOW becomes reality.

Thank you,

David N. Larsen P.G

Subject: RE: Tomorrow's Conference Call

If it is possible to put in wells, I would prefer the following week due to Bristol's availability. They are available then but I don't know if they could oversee field work next week with such a small amount of lead time.

I am available to talk to anyone/everyone most of the rest of this week with the exception of scattered calls and meeting times.

Subject: Tomorrow's Conference Call

As you can see in Kristen's response, she is not available tomorrow, but is available on Friday. I did just call both her phones, left messages, and notified her of this morning's e-mail with intent to hopefully install wells maybe as early as next week. I also asked her to take a look at the locations in advance of Friday to let me know if she had any concern/recommendations. Unless someone tells me otherwise, I will continue to prepare costs because I am very quickly running out of time. Do we need to have an informal discussion before Friday?

Thank you,

Good Morning:

Would you folks have some time later this week to have an abbreviated technical group discussion? If we want to get additional monitoring well installed yet this year, we should talk soon.

I have time on Wednesday afternoon (1-2 PM or 3- 4 PM) or on Friday. Please let me know if either of those options would work and I'll set up a call. Thanks!

Good Morning:

Better late than never, attached are the notes that I took on our October 27 call. Please hit Reply All with your comments.

Also, I just realized that the November call is scheduled for Thanksgiving morning. Options include having the call on Wednesday the 23rd or moving it into December. Please share your

thoughts on that, too.

Thanks!

We are committed to service excellence.
